

Handset Designer 2020 R1

Version: 5.0.107 **Release Date:** November 17, 2020

Enhancement Release Notes

- Fix data storage to not require Microsoft Access engine, which has also been removed from the installer as a prerequisite.
- Update digital certificate to use newer protocols of digital signing.
- All graphics have been updated to the new Avontus theme
- If no formwork is drawn or the correct objects aren't selected when clicking Formwork Stackup or the Left-Right Panel Dimensions buttons on the toolbar will display the appropriate message indicating what should be selected.
- Added improved crash reporting with option to give information on what happened.
- All of the settings files have been moved to the common app data folder. You may need to reset your default settings in Options.

Bug Fix Release Notes

- Fix help documentation to point to new site.
- Fix numerous bugs that were reported from crash reports.
